PROFESSIONAL SUMMARY

Full Stack Developer with 9 months of professional experience building responsive web applications and full-stack solutions using React.js, Next.js, TypeScript, JavaScript, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, authentication systems, responsive user interfaces, and Generative AI integrations. Strong foundation in modern frontend and backend development with a focus on clean, maintainable, and scalable software.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Tailwind CSS, Framer Motion, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, OAuth, Authentication

Databases: MongoDB, PostgreSQL, pgvector, Vector Databases

Generative AI: LLM Integration, RAG, AI Agents, Prompt Engineering, Tool Calling, Embeddings, AI Workflows

AI Tools and APIs: Google Gemini API, Groq, OpenRouter, Tavily, LangChain, LangGraph, ElevenLabs

Tools: Git, GitHub, Postman, VS Code, LaTeX

WORK EXPERIENCE

Junior Web Developer

Jul 2025 – Apr 2026

Tech Scooper

9 months

- Built responsive web applications and landing pages for construction and AI education websites using React.js and Tailwind CSS.
- Developed a web-based LaTeX editor with live preview, syntax highlighting, PDF export, and reusable document templates.
- Translated UI designs into functional frontend interfaces while collaborating with designers and maintaining responsive layouts.
- Implemented responsive web experiences optimized for mobile, tablet, and desktop devices.

PROJECTS

Truveler – AI Trip Planner

MERN Stack / React.js, Node.js, Express.js, MongoDB, Google OAuth, Google Gemini, OpenRouter, Tailwind CSS, shadcn/ui

- Developed a full-stack AI-powered trip planning application using React.js, Node.js, Express.js, and MongoDB.
- Built personalized itinerary generation based on destination, budget, and user preferences using Generative AI.
- Integrated Google OAuth for user authentication and session management.
- Integrated Google Gemini through the OpenRouter API for AI-powered itinerary generation.
- Developed a responsive frontend using React.js, Tailwind CSS, and shadcn/ui.

Bangla Bijoy Editor – Bengali Unicode and Bijoy Conversion Tool

Next.js, TypeScript, Tailwind CSS, shadcn/ui, ElevenLabs APIs

- Developed a web-based Bengali editor using Next.js and TypeScript for converting English phonetic input into Bangla Unicode and Bijoy encoding.
- Implemented Unicode-to-Bijoy conversion to support legacy publishing software, Adobe applications, and traditional Bengali publishing workflows.
- Integrated ElevenLabs Speech-to-Text and Text-to-Speech APIs for voice-enabled editing and transcription.
- Built a responsive user interface using Next.js, TypeScript, Tailwind CSS, and shadcn/ui.

LaTeX Editor

React.js, TypeScript, Tailwind CSS

- Built a browser-based LaTeX editor with real-time live preview for document creation and editing.
- Implemented syntax highlighting to improve code readability and editing experience.
- Added PDF export functionality for generated documents.
- Created reusable templates for different document types.

EDUCATION

Bachelor of Computer Application

CGPA: 9.06/10

Techno India Hooghly

Relevant Coursework: Data Structures, Database Management, Web Development, Artificial Intelligence

LANGUAGES

Bengali (Native), English (Fluent), Hindi (Fluent)

INTERESTS

Open-Source Contributions, Full Stack Web Development, Generative AI, AI Applications, Software Development
